

Poster title in UCL Sans SemiBold at 72 pt, left aligned, running to three lines at most

First Author¹, Second Author^{1,2}, Third Author²

¹Department, UCL
²Partner institution

Introduction

Aim for 300–600 words in total, concise and straight to the point.
Body text is 36 pt and left aligned. Keep everything at 24 pt or above; only captions may be smaller.

- Use bullet points to break up large areas of text.
- Set headings in bold.
- Use one or two colours, plus images and charts.

References and acknowledgements can go down to \small (28.6 pt) or \footnotesize (24 pt).

Methods

Letters and digits in maths are set in the text font:

$$E'_\gamma = \frac{E_\gamma}{1 + (E_\gamma/m_e c^2)(1 - \cos \theta)}$$

UCL Sans has no Greek letters, so Greek and maths symbols come from Computer Modern.

Results

Insert figures as files: PDF where possible, raster images at 150 dpi or more at printed size.

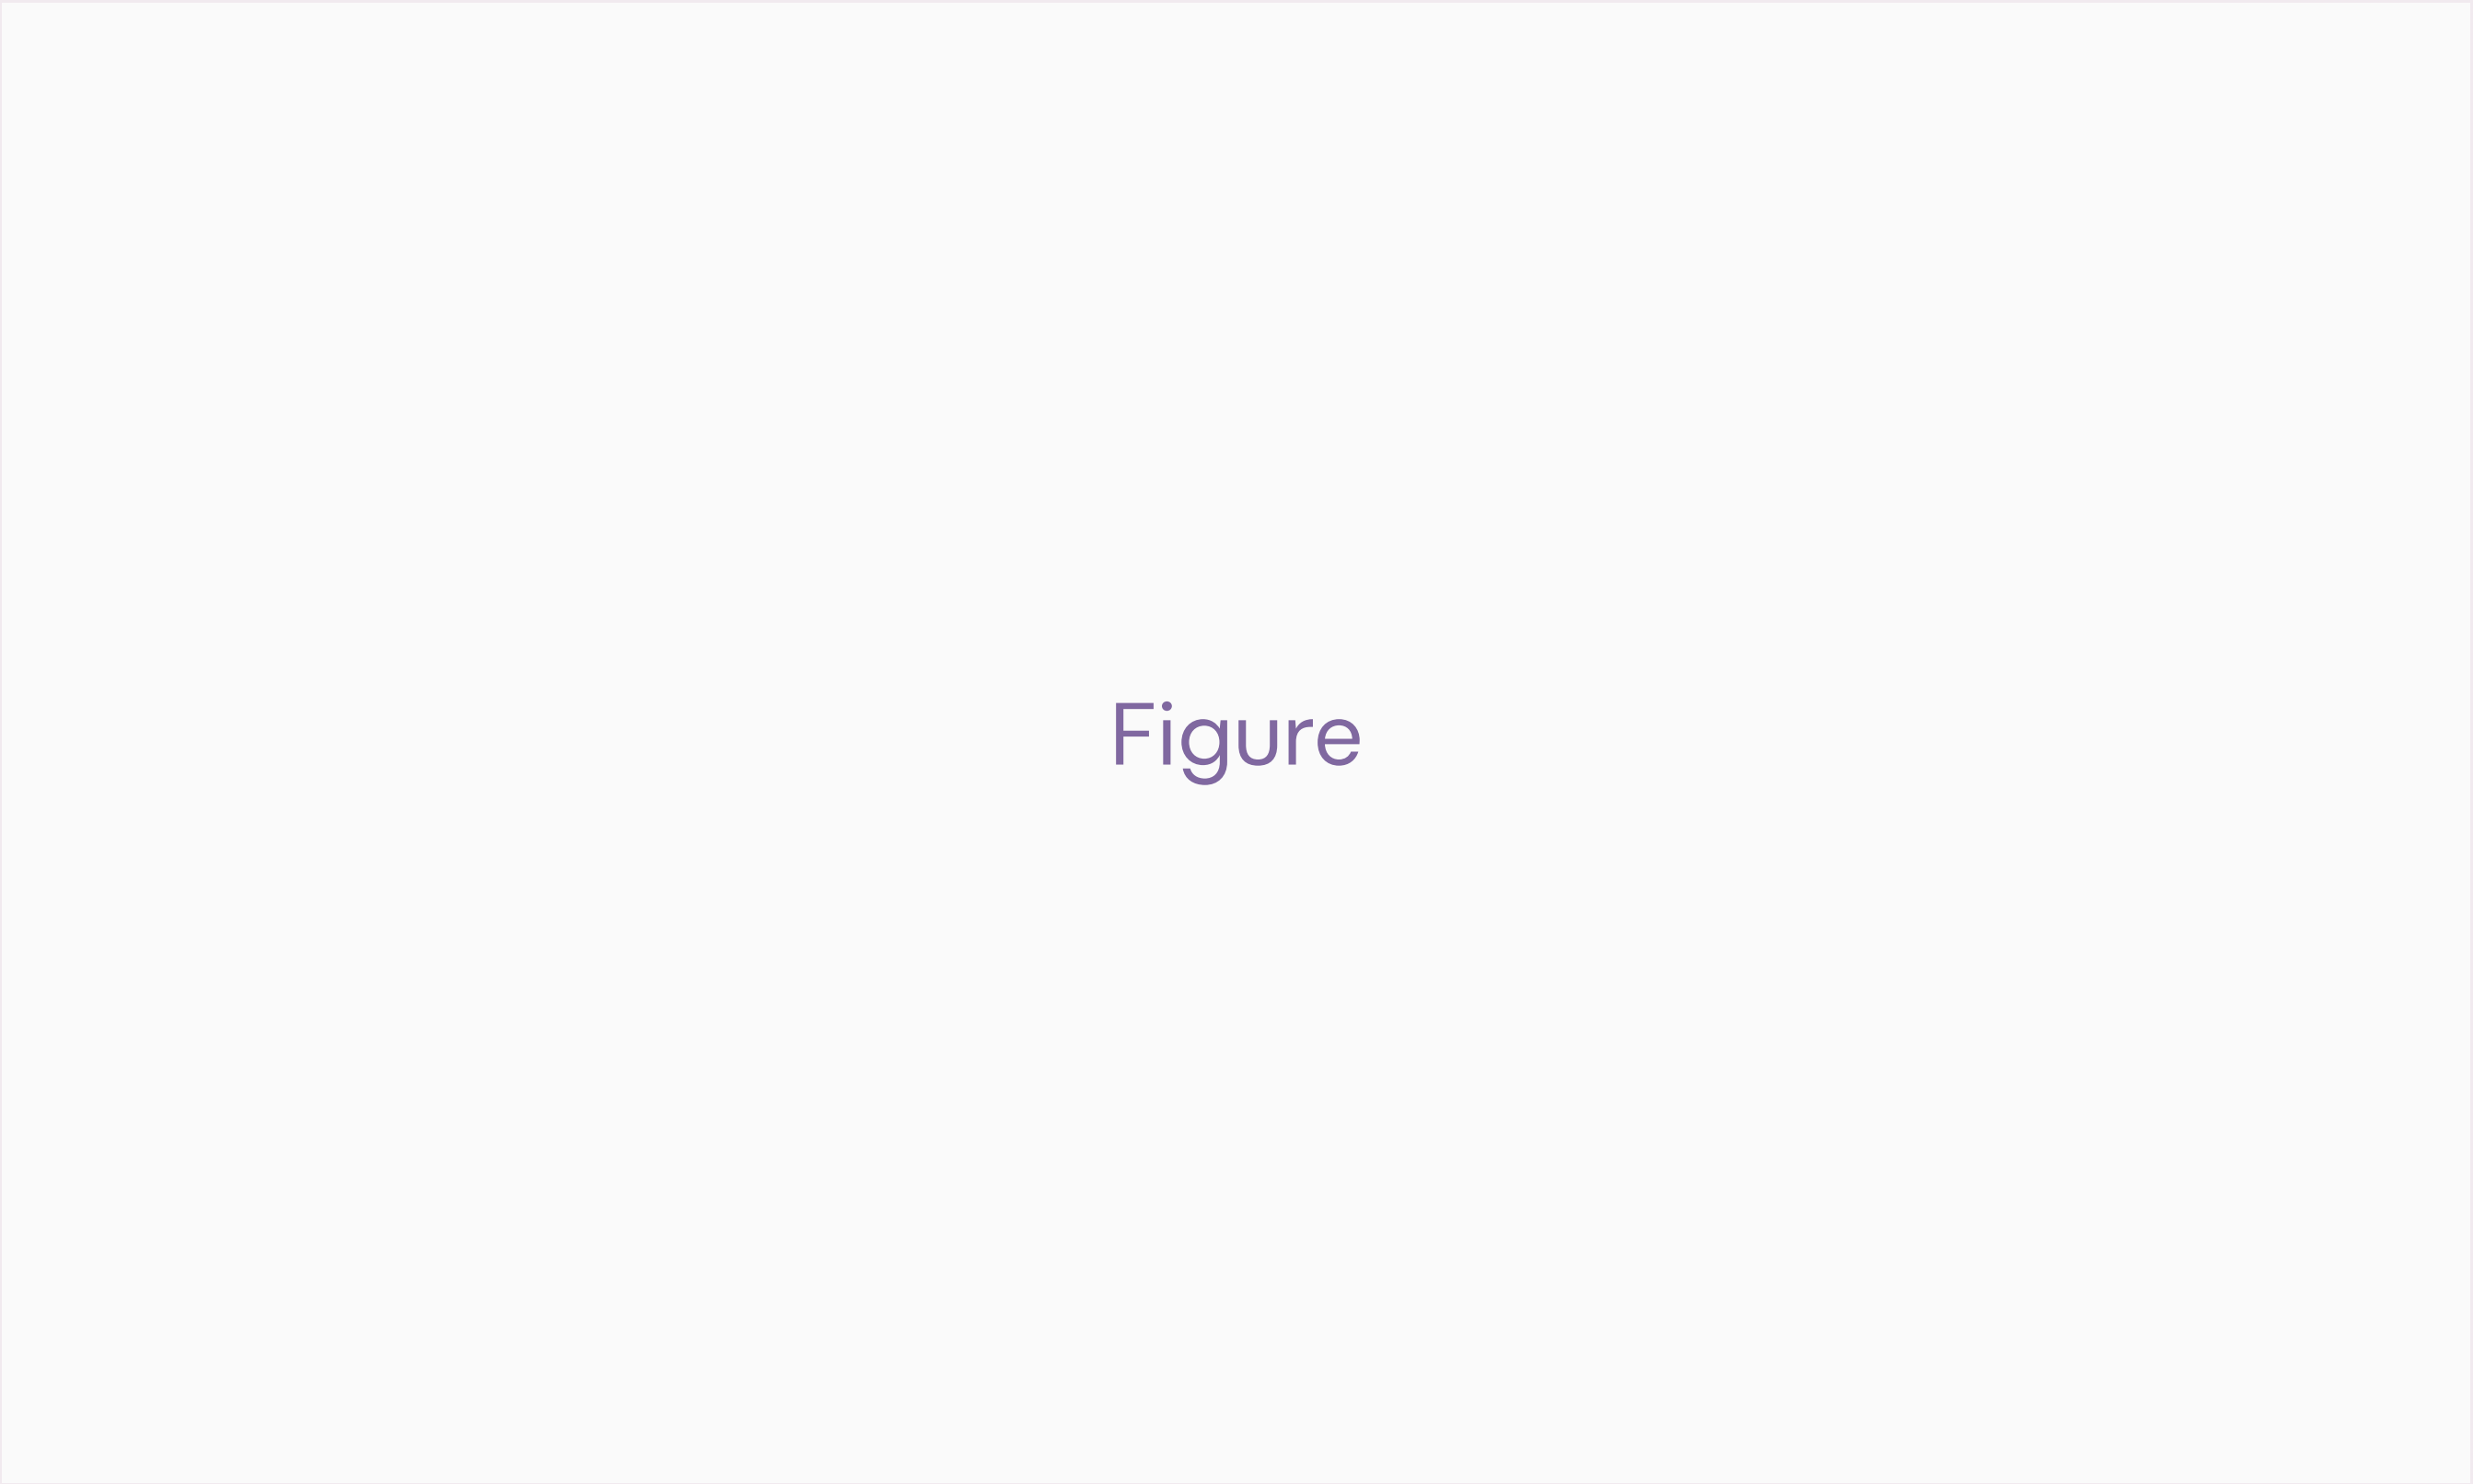

Figure 1: A figure caption, set at 24 pt.

Setting	Value (s)	Ratio
First	1200	1.0
Second	310	3.9
Third	95	12.6

Table 1: A table caption.

A third box

A box is as tall as its `rowspan` says, whatever it holds. If the content is too tall, the log carries a warning and `showgrid` marks the box in pink.

Sample layouts are in `layouts.tex`. Pick one of these, or make your own: `column` and `span` set a box’s starting column and width, `row` and `rowspan` its starting row and height. `layouts.pdf` shows the grid.

Conclusions

- Add `ucl dark` to a box to make it stand out.
- Add `ucl plain` for a box with no fill.
- Every other box keeps the template’s pale purple.
